

SmartSeq Kit

Smart Up Your Research.

How does SmartSeq work?

Order SmartSeq Kit

Order your SmartSeq Kit with 96 pre-labelled tubes and tube lids for secure sealing.

Prepare Template

Pipette purified DNA and primer as premixed template in one tube as stated in our sample submission guide.

Send Tubes

Simply send us your samples using a drop box near you or any postal service of your choice. No sequencing order needs to be placed.

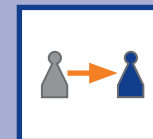

Download Results

Securely download your SmartSeq results in your personal online account the very next morning.

Share your SmartSeq Kit with your colleagues using our Group Administration Tool!

Give a SmartSeq Kit to someone else with all rights and data access using the online assign option in your account.

The smartest solution for your premixed samples in tubes.

Discover ultimate innovation.

Experience highest convenience.

What is SmartSeq?

Our SmartSeq Kit is the most convenient and advanced prepaid sequencing solution for your premixed samples in tubes.

It combines the advantages of our online shop features including the administration of your SmartSeq Kits and secure access to your sequencing data.

The actual ordering process is easier than ever before since no further order entries are necessary after one single order for a SmartSeq Kit has been placed.

Ultimate innovation

- Simply place one online order for all 96 tubes in your SmartSeq Kit and only get one invoice.
- Easily share the tubes of your SmartSeq Kit with colleagues and grant them access to the sequencing data with our Group Administration Tool.
- Assign an entire SmartSeq Kit to someone else and provide them with all the rights and data access of the kit.

Highest convenience

- Every SmartSeq Kit includes 96 pre-labelled tubes and tube lids for secure sealing.
- No more handling stress. Just note the code on the side of the tubes for your records and send us your samples tubes.
- Simply send us your samples using our free pick up service or any postal service of your choice.

Guaranteed data security

- Get all your sequencing data as .ab1, .scf and fasta files in your personal online account the very next morning upon sample receipt.
- Check the status of your SmartSeq Kit and SmartSeq reads anytime via your online order history.
- Secure archive of your sequencing data for more than 100 days.

Excellent quality & service

- Obtain reading lengths of up to 1100 high quality bases.
- Receive a quality report in PDF format.
- Contact our technical support for help and troubleshooting.
- Use our sample bags and boxes to send us your samples.
